

CaseMatrix Limited Announces Official Launch: A Revolutionary Approach to Cyber Breach Litigation

CaseMatrix Limited, a pioneering firm focused on bridging the gap between cyber breach victims and legal recourse, is thrilled to announce its official launch. With a unique service offering, CaseMatrix aims to transform the landscape of cyber breach litigation by connecting legal professionals with affected individuals, ensuring that every victim has a voice.

Founded by Jake Rogers and Rob Moore, two seasoned professionals with extensive backgrounds in cybersecurity and legal consultancy, CaseMatrix leverages a unique methodology to identify and reach out to cyber breach victims. By offering them cybersecurity support and notifying them of breaches, the company ensures a seamless transition from breach notification to legal action.

Key Highlights of CaseMatrix Limited:

- 1. Victim-Centric Approach:** At the heart of CaseMatrix's operations is a deep commitment to the well-being of cyber breach victims. The company's primary goal is to ensure that every individual affected by a breach is informed, supported, and has the opportunity to seek legal justice.
- 2. Unique Methodology:** CaseMatrix's innovative approach involves actively reaching out to individuals as security experts, notifying them of breaches, and offering cybersecurity support. This methodology not only ensures compliance with legal regulations but also

builds trust with potential claimants.

- 3. Collaboration with Legal Firms:** CaseMatrix works closely with legal firms, understanding their litigation aims, and providing them with a refined set of profiles. This targeted approach ensures that legal professionals receive only viable cases, saving them time and resources.
- 4. No Upfront Costs:** With a standard introducer's agreement, legal firms can collaborate with CaseMatrix without any financial commitment until the actual referral process begins.

Jake Rogers, co-founder of CaseMatrix, commented, "Our vision is clear: to ensure that every data breach victim is represented and has access to legal justice. With the rise in cyber incidents, our services are more crucial than ever. We're excited to work alongside legal professionals to make a tangible difference."

Rob Moore added, "Behind every data breach statistic is a real person. At CaseMatrix, we're committed to ensuring that these individuals are not just numbers but are given the support and representation they deserve."
